### EXAMINER'S AMENDMENT/COMMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Glenn Law, Applicant's Representative, on November 4, 2004.

Non-elected process claims 11-14 are canceled. These claims do not qualify for rejoinder with the allowed claims under MPEP 821.04 because they are directed neither to a process for making the product nor to a process for using the product.

The allowed claims directed to an apparatus, i.e., a reactor. The non-elected process claims are directed to a method of operating said apparatus. Even assuming for the sake of argument that the apparatus is considered a "product", the claimed step of setting a numeric value for the control blade-to-surface area ratio of  $0.065 \text{ cm}^{-1}$ , would not qualify the claim as a use of the "product". This ratio is fixed prior to operation by the configuration of the components that form the reactor, and it cannot be set as part of the operation process, contrary to Applicant's claims.
